Pat Sloan Pumpkin Challenge - Gobble Gobble

The Challenge Using Moda's Gobble Gobble precuts create a Thanksgiving Wall hanging.

Start NOW, Finish by Nov 10

(if you do not have any Gobble Gobble fabric to participate you will find a complete listing of stores that carry Gobble Gobble- that is if you get it before it is gone!) The stores are listed by state. Click on any blue link to visit the store's website.

Ingredients:

Gobble Gobble Layercakes, Turnover triangles and Jelly Rolls or Honeybun strips.

All the other usual accomplices... rotary cutters, square rulers, mats, machines and irons.

Instructions:

I sewed all the orange fabric strips to make the pumpkin. You could mix in the tan from this line and get 2 pumpkins ... cut up your cakes and get more! Take the 'left overs' ... sew them together and get more pumpkins!

Original Recipe can be found at www.modabakeshop.com

Only have a cake? Cut a few of the orange into 1.5" or 2.5" strips and sew together. If you have a cake, sew two squares together for the pumpkin background. If you don't, sew honeybuns or jelly rolls together to make the background for the pumpkin.

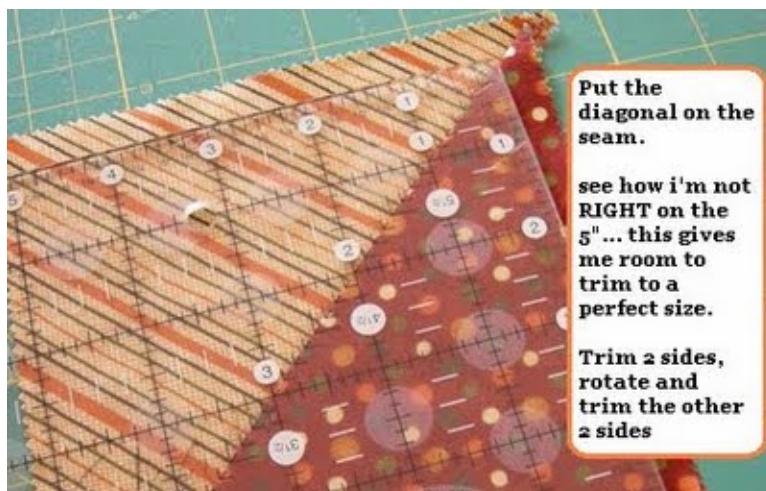

See this link for the 'donut' method of appliqué, or get my book on it!

PART 2:
 Now I made some hour glass blocks.
 Here is what you do sort your turnover triangles into light and dark.

Match two fabric for a pair, light and dark. You need 4 to get an hour glass

Sew the 2 triangles together and press Trim to 5" square lining up the diagonal on the ruler on the seam of the block

lovely blocks!
make some more!

Now cut this square in half following the photo. Pair 2 sets up and sew those!

match them up and sew... sew... sew!

Make more... lots more.. they are fun to do!

Now go make a mess... have some fun!

Original Recipe can be found at www.modabakeshop.com

Crank up your music and let the creativity begin! Start putting pumpkins, strips and hourglass blocks. Once something starts to look great, sew it together. Sew your top in hunks and chunks. Sew it in rows... how ever you do it, sew it so there are no inset seams... those make ya crazy! Once the center of your quilt is 'looking good in the neighborhood', see what fabric you have left. Sew an inner border all around to contain all the 'fun!' Then do an outer border with your leftover bits.. OR.. buy yardage, you deserve it!

Post a photo of your project to the flickr group... your done! oh... quilt it to ... and add that label.. NOW your done!

Head on over to the QuiltMashup to chat with Pat and keep moving on your Challenge. It's a fun place to share your progress and get advice from everyone!

Pumpkin Challenge By Pat Sloan

NOTE -

The pumpkin templates are too BIG for a piece of paper.

Please draw one full template onto your fusible before you apply it to fabric.

Shapes look like these after drawn together on the fusible. They make one whole pumpkin

Wide pumpkin
Right side. Match to
the left side and create
one template. cut (1)

All shapes are reversed for Fusible applique.
