# 1974

## Urban Chiks

It's time for a road trip, with nothing but a backpack, four wheels and a working motor. 1974 is about the wind in your hair and the crunching of gravel under foot. With patterns alternately bold and delicate, this collection is a journey weaving the past, present and future into a delicate network of cotton threads. Fresh and modern with vintage roots, 1974 is everything you have come to love about the Chiks.
