The use of world maps, road maps, postcards, old letters and even blueprints are becoming a classic accent in the use of home decor. Decorators are taking vintage papers, found objects and old icons in their original state, but also as inspiration as they strive to update their living space with a cozy, old world feel. Whether it’s to bring a sense of nostalgia or to satisfy their wanderlust, you will find maps a “must have” when personalizing your living space. Be sure to add these new maps of New York, London, and Toyko to the Passport collection!
