Cloud Cover Stitch

New!

Fuse Cloud Cover Stitch over the back of a finished design to cover scratchy stitches on the backside of embroidery designs. It is soft and sheer - ideal for baby garments, golf shirts, or tees. Anywhere to avoid a scratchy irritant to the skin!

Please note: Cloud Cover Stitch is not a stabilizer.

Cloud Cover has a very unique multi directional stretch. It bonds at a moderate temperature with your fabric but will in no way adversely affect the bulk or drapability of your garment.

It is also used on silks and satins in order to arrest any unraveling or shredding while sewing.

Available in the following colors and size:

20 x 25 yard bolt White 1890-1

20 x 25 yard bolt Black 1890-2
