

Universal Rulers

What makes the Universal Rulers so special?

- ♥ Metric and inch measurements are equally represented on the same ruler.
- ♥ There are strong vertical measuring lines for cutting strips in both metric and inches.
- ♥ The lines are distinctly different for millimeters, centimeters and every 5 centimeters as well as for $1/8$ ", $1/4$ ", $1/2$ " and 1".
- ♥ Metric measurements on one end of the ruler run into inch measurements on the other end making it easy to convert accurately. Some of the most common conversions are actually printed on the ruler.
- ♥ Purple ink is uniquely visible against both dark and light fabrics.
- ♥ Precise printed lines (not thick) mean more accurate sizes.
- ♥ 45° and 60° angle lines, a hanging hole and clarity for easy viewing.

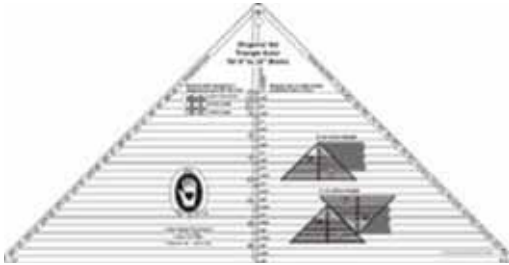

Sizes: 6" x 18" or 6" x 24"
