

NEW!

Karen Kay Buckley Perfect Ovals

Instructions Included!

1. Place the plastic oval in the center of the fabric.

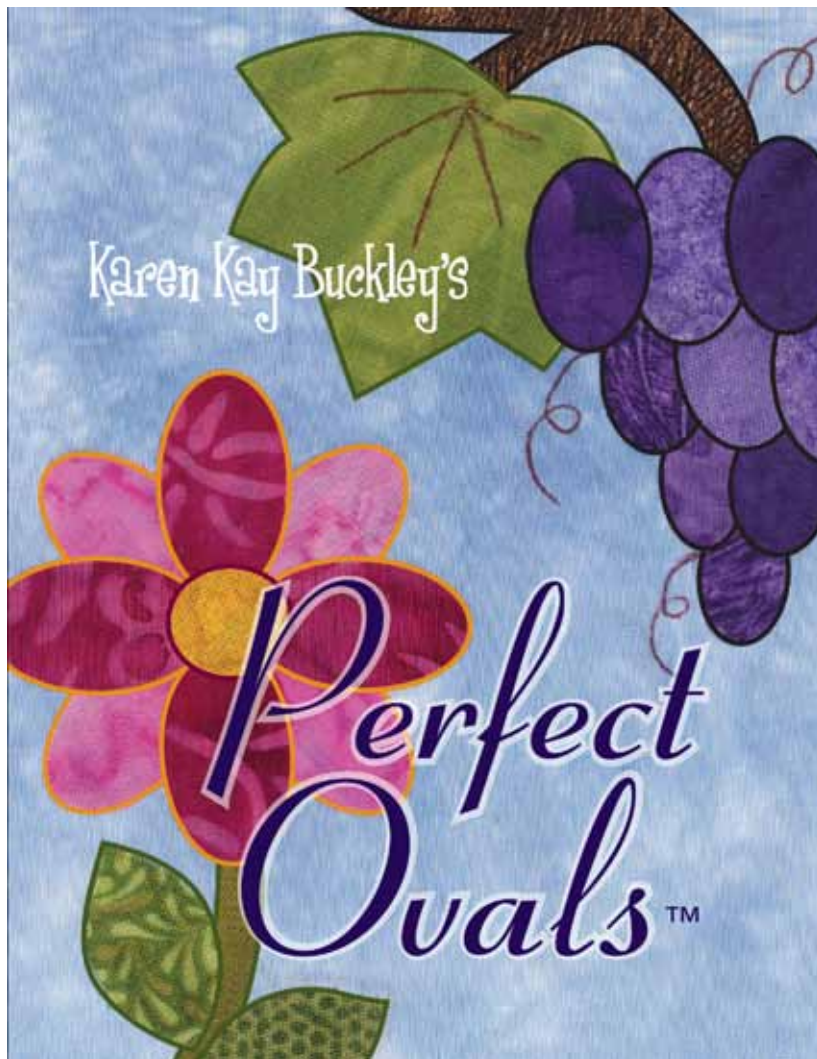

2. Pull on the thread, and the seam will gather around the oval. To keep the seam snug, hold tightly, and pull the thread across the oval.

3. After the sizing is dry, loosen the seam where you finished your running stitch. The end of the running stitch is easy to find if you left a tail of thread.

4. After removing the plastic oval, pull gently on the tail of thread to close the seam. Now you have a perfect oval to hand or machine applique on your favorite project.

Made from heat resistant plastic, there are 10 sizes, 2 of each size per package. The smallest width is 5/8" and the widest is 1-3/8".
