

RELIABLE

Digital Velocity Compact Vapor Iron

Enjoy professional ironing quality and speed with the simplicity of using a traditional iron.

PATENTED TECHNOLOGY: Incorporates an internal heating element and pump system that produces more steam continuously than conventional irons. This guarantees a professional finish to your garments. The digital thermostat controls the temperature with far greater accuracy than conventional non-digital irons.

WOOLMARK APPROVED: Doesn't produce steam at the soleplate like traditional irons, but generates it inside, in a pre-heating chamber. With this advanced technology, there is need to have a higher temperature in order to prevent water spitting.

ACOUSTIC WARNING DEVICE: Beeps when the desired temperature is reached, when the auto shut-off safety system is activated and each time you press a selection button.

ECO-INTELLIGENT™ FEATURE: To save energy and water the iron will stop steaming after 3 seconds of not detecting movement. When you are ready to iron again, simply pick up the iron and begin pressing. There is no need to touch a button for steam.

STEAM READY™ FEATURE: Allows the user to iron continuously without the auto shut-off feature. When activated, the iron will not shut off, unless manually turned off by the user.

Ergonomically designed handle to reduce hand and wrist stress

1800 Watts of power
