PRESS & PIN

NEW THICKER SURFACE
ALLOWS YOU TO PIN YOUR
PROJECTS BEFORE PRESSING

NOW IT'S A DESIGN & PRESS BOARD

The ultimate pressing and design surface
Why everyone wants The Steady Betty
The pressing process is as important as the sewing.

It's Steady. Fabric stays where you want it to stay. When you are pressing your piecing using The Steady Betty, there will be less stretching and distortion than with traditional ironing surfaces. The Steady Betty stays cooler than most pressing surfaces but allows the heat on the fabric to be as hot as needed. When working with any project that requires your fingers to be in contact with the ironing surface, you will be amazed that The Steady Betty will be cooler than other surfaces. This allows you to play with your projects without burning your fingers. When pressing, you will find seams will be uniform and straight. Long strips, such as bias, will grab the surface so you will have less distortion and stretch. Remember this! The Steady Betty will save you time and energy. We think you will really enjoy the wonderful results you get with your Steady Betty.
