

LONGARM TITANIUM NEEDLES

NEEDLES FOR LONGARM MACHINES

- Specifically made for multi-directional use, which is exactly what longarm machines need
- Titanium-coated needles last longer and run cooler
- Multi-directional design means more accurate stitching while moving the machine in any direction
- Extra strength for maximum flexibility and bending
- Deep scarf prevents skipped stitches, less puckering, and less thread breakage.

*NOTE: These needles do not fit A-1 machines. Check with your machine dealer to confirm your machine can use Groz-Beckert style 134 needles.
